Total Body Conditioning and Strength (Certified Personal Trainer Led workouts, no fee)

Conditioning workouts benefit everyone from athletes to people looking to lose weight. Total Body Conditioning and Strength is a program comprising whole body workouts to improve cardiovascular endurance, strength, flexibility, power, speed and balance. It is a unique strength and conditioning workout routine split into circuits or stations using your own bodyweight and also adding multiple pieces of equipment like kettlebells, medicine balls, dumbbells, weights, ropes, barbells, plyo boxes and more. The program is designed for anyone committed to improving their physical abilities. We can regress and progress individual exercises as needed, the program doesn't change.

Enhanced Classes: (Contracted Instructors, Spin, Yoga and Qigong has a \$2 fee).

SPIN:

This is a 45 min. stationary cycling class that combines basic cycling movements with correct breathing, heart rate training and great coaching. It is a non-impact, individually paced, cardio class great for any fitness level. Instructors will guide participants through workout phases: warm-up, steady cadences, sprints, climbs, cool-downs, etc. while listening to upbeat music. Each individual controls their resistance on the bike to make the pedaling as easy or difficult as they choose.

Yoga:

This total mind-body workout that combines strengthening and stretching poses with deep breathing and meditation or relaxation. Our Yoga instructors are able to accommodate the exercises to any fitness level so anyone from beginner to advanced participants can take this class.
